

Monthly Communicable Disease Report Summit County July, 2023

Monthly Highlights/Observations:

1. Tuberculosis- No suspected cases of TB were reported in July and 21 contacts from current and previous cases continue to be investigated. In addition, the program remains open to continue the tuberculosis screening process in collaboration with other agencies and healthcare providers. SCPH CDU currently provides direct observed therapy (DOT) to 6 cases. No DOT cases were closed in July. DOT clients receive daily to monthly visits via video calls depending on side effects and where the client is in treatment. All cases are complex, which requires collaboration and coordination between multiple agencies and external community services.

The Communicable Disease Unit investigated 189 communicable disease cases in July: 73 cases of Lyme disease, 19 cases of Hepatitis B-Chronic, 13 cases of Campylobacter, 9 cases of Salmonella, 7 cases of CPO-Enterobacter, 7 cases of CPO-Pseudomonas, 6 cases of E.coli, 6 cases of Varicella, 5 cases of Strep - Group A, 4 cases of C.auris - Investigation, 4 cases of CPO-Acinetobater, 4 cases of Giardia, 4 cases of Hepatitis A, 3 cases of Babesiosis, 3 cases of CP-CRE, 3 cases of Legionella, 2 cases of Cryptosporidiosis, 2 cases of Shigellosis, 2 cases of Strep Pneumo, 2 cases of West Nile Virus, and one case each of Amebiasis, CPO-Investigation Pseudomonas, Cyclosporiasis, Dengue, Haemophilus Influenzae, Hepatitis B - Acute, Measles, Meningitis - Aseptic, Pertussis, Rabies and Spotted Fever Rickettsiosis. Note: Since some reported cases end up being classified as "Not a Case" in ODRS or the case may have been previously reported, the investigation case totals may vary compared to the counts in the table

2. Outbreaks: 1 new COVID-19 outbreak was identified by the CDU in July. 5 non-COVID-19 outbreaks were investigated in July. 8 additional COVID-19 outbreaks remain open and investigation will continue until no new cases are reported.

COVID-19: There were 262 confirmed or probable cases of COVID-19 reported in Summit County in July. COVID-19 information, a weekly COVID-19 report, and a dashboard with data for Summit County can be accessed here: <https://www.scph.org/covid>

3. Epicenter: Epicenter is an electronic surveillance system which provides instant notification of unusual symptomatic activity at local Emergency Departments. 10 Epicenter alerts were issued during July : Botulinic (2), Vision (2), Class A Measles (1), Class A Rabies (1), Class A Rubella (1), Diarrhea (1), Edema (1), Nausea (1).

4. Influenza Surveillance: Surveillance for the 2022-2023 concluded on May 6, 2023, the final report was released May 13, 2023. Data from previous influenza seasons are available in an influenza dashboard, which is located on the SCPH website: <https://www.scph.org/dashboards>

5. Vector-borne Surveillance: Vector borne surveillance has resumed as of May 22, 2023 and reports for 2023 are available. Copies of the reports for 2023 and previous years may be accessed at: <https://www.scph.org/vector-surveillance-reports>

Communicable Disease Reports Received, July 2023

Reportable Condition	July 2023	June 2023	Year-to-Date 2023	Year-to-Date 2022
Amebiasis	1	2	6	6
Anaplasmosis-Anaplasma phagocytophilum	0	1	1	NR
Babesiosis	1	0	1	0
Botulism - infant	0	0	0	0
Botulism, food borne	0	0	0	0
Brucellosis	0	0	2	0
C. auris	1	0	3	NR
C. auris - Investigation	3	4	17	NR
COVID-19	262	337	6,862	33,588
CP-CRE	11	11	59	12
CP-CRE Investigation	2	4	12	NR
Campylobacteriosis	12	5	46	56
Chikungunya virus	0	0	0	NR
Chlamydia infection	227	234	1,670	1,698
Cholera	0	0	0	0

Yersiniosis	1	0	4	6
Zika virus infection	0	0	0	0
Total	764	804	10,225	37,031

Notes:

1) This report includes the number of reports of disease received and investigated by Summit County Public Health (SCPH). **This includes all reports that were determined to be probable, suspected, or confirmed.** Based on case investigation, clinical diagnoses, IDCM case definitions, and lab results, the case status may change. NR = not reported in previous year.

2) The Total Year-to-Date column reflects all cases of disease where SCPH is identified as the local health department in the Ohio Disease Reporting System (ODRS) as of the date that data was extracted. This includes the cases of disease entered into ODRS after last month's report was generated which will now be included in the Previous Month Revised column. Data may also vary in response to recent changes in data extraction and analysis. **Because case classifications can change over time, monthly figures should not be considered final until the annual report is complete.**

3) The number of perinatal hepatitis B cases reflect the number of infants born to hepatitis B positive mothers during the reporting period. These infants will be followed by the Perinatal Hepatitis B Prevention Program (PHBPP) until serology indicates that the child has immunity.

For questions or comments about this report, please contact the Communicable Disease Unit at (330) 375-2662. This report was issued on August 8, 2023.
